OSHA - 10 Hour Construction Industry Outreach Training - English & Spanish

Cost : \$US 139

This course is designed for construction workers, foremen, job supervisors, and anyone involved in the construction industry. OSHA recommends Outreach Training Program courses as an orientation to occupational safety and health for workers covered by OSHA 29 CFR 1926. Workers must receive additional training, when required by OSHA standards, on the specific hazards of the job. Upon successful completion of the course, participants will receive an OSHA construction safety and health 10-hour course completion card from the Department of Labor. Note: This online course has been reviewed and accepted by OSHA for online distribution.

OSHA - 30 Hour Construction Industry Outreach Training

Cost : \$US 295

This course covers thirty (30) hours of training, required by the Occupational Health and Safety Act (OSHA), that apply toward the 30-hour Construction Industry course completion card. The course is comprised of 25 sections, each either one or two hours in length, and covers topics pertaining to regulations covered by Standard 29 CFR 1926. The successful completion of this course will help meet the Construction Industry standards established by OSHA.

OSHA - 10 Hour General Industry Outreach Training

Cost : \$US 139

This course is ideal for supervisors with safety and health responsibilities, and for employee safety and health awareness. Students will be introduced to OSHA policies, procedures and standards as well as general industry safety and health principles covered in OSHA Act Part 1910. Special emphasis will be placed on areas most hazardous using OSHA standards as a guide. Upon successful completion of the course, participants will receive an OSHA general industry safety and health 10-hour course completion card from the Department of Labor. Note: This online course has been reviewed and accepted by OSHA for online distribution.

OSHA - 30 Hour General Industry Outreach Training

Cost : \$US 295

The OSHA 30 Hour General Industry Outreach Training course is a comprehensive safety program designed for anyone involved in general industry. Specifically devised for safety directors, foremen, and field supervisors; the program provides complete information on OSHA compliance issues. OSHA recommends Outreach Training Programs as an orientation to occupational safety and health for workers covered by OSHA 29 CFR 1910. General industry workers must receive additional training, when required by OSHA standards, on specific hazards of the job. Upon successful completion of the course, participants will receive an OSHA general industry safety and health 30-hour course completion card from the Department of Labor. Note: This online course has been reviewed and accepted by OSHA for online distribution.

OSHA Outreach Training / OSHA - Construction Spanish Versions

Concrete and Masonry

Cost : \$US 20

This course is designed for construction workers who want to learn about precautions and dangers that come from concrete and masonry projects. Topics include general requirements, cast-in-place concrete, and masonry construction. This course covers the topics included in OSHA 29 CFR 1926.7 Subpart Q.

Cranes and Rigging

Cost : \$US 20

This course is intended for workers who want to learn more about cranes, derricks, hoists, elevators, and/or conveyors. Topics include cranes & derricks, helicopters, base-mounted drum hoists, overhead hoists, conveyors, and aerial lifts. This course covers the topics included in OSHA 29 CFR 1926.55 Subpart N.

Electrical Safety

Cost : \$US 20

This course provides an overview of basic electrical safety for individuals with little or limited training or familiarity with electrical hazards and is designed for any worker who may use extension cords, electric tools, etc. This course covers the topics included in OSHA 29 CFR 1910.301-399 Subpart S.

Excavations

Cost : \$US 20

Cave-ins are considered the most dangerous trench and excavation hazard. In addition, other potentially fatal hazards also exist in excavations, such as asphyxiation due to lack of oxygen in a confined space, inhalation of toxic fumes, drowning, falls, water accumulation, etc. The OSHA standards intend to protect workers in trenches and excavations. This course gives you a basic understanding of how to work safely in excavations and what important points are required to consider when working in an excavation.

Fall Protection

Cost : \$US 20

This course gives you a basic understanding about OSHA's role in prevention and elimination of work-related illnesses and injuries. The OSHA standard identifies areas or activities where fall protection is needed. It clarifies what an employer must do to provide fall protection for employees, such as identifying and evaluating fall hazards and providing training. Under the standard, employers are able to select fall protection measures compatible with the type of work being performed.

Fire Protection

Cost : \$US 20

This course has been designed to deliver firsthand information about fires and fire protection measures. After completing this course, you will be able to identify different types of fires and how safety measures can be taken to avoid a disastrous situation. We will also discuss the different types of fire extinguishers in use and discover how careful planning and precautionary measures can be taken to save lives and property. This course is intended for the general audience. For more information, please contact your local fire department and consult your fire safety and security maintenance supervisor.

General Safety & Health Provisions

Cost : \$US 20

This course provides an overview of the OSHA standard for General Safety and Health Provisions (OSHA 29 CFR 1926 Subpt C). Topics covered in this course include safety training and education, first aid, fire protection, as well as employee emergency action plans.

Hand and Power Tools

Cost : \$US 20

This course gives you a basic understanding about OSHA's role in prevention and elimination of work-related illnesses and injuries. Hand and power tools are a part of our everyday lives and help us to easily perform tasks that otherwise would be difficult or impossible. However, these simple tools can be hazardous, and have the potential for causing severe injuries when used or maintained improperly. Special attention toward hand and power tool safety is necessary in order to reduce or eliminate these hazards.

Introduction to OSHA and OSHA Act

Cost : \$US 20

This course gives a basic overview of OSHA, OSHA act, and OSHA's role in prevention and elimination of work-related illnesses and injuries. It includes information about employer and employee rights and responsibilities, and a very brief look at the inspection process, reporting and recordkeeping. This course will prove beneficial for those who are directly or indirectly involved with OSHA and OSH Act.

Scaffolding

Cost : \$US 20

This course gives a basic overview of OSHA, OSHA act, and OSHA's role in prevention and elimination of work-related illnesses and injuries. It includes information about employer and employee rights and responsibilities, and a very brief look at the inspection process, reporting and recordkeeping. This course will prove beneficial for those who are directly or indirectly involved with OSHA and OSH Act.

Stairways & Ladders

Cost : \$US 20

This course gives you a basic understanding of OSHA standards and its role in the prevention and elimination of work-related injuries and fatalities due to stairways and ladders at workplaces.
